

John Muir – Hemp Farming Systems Consultancy Group

John Muir has been an Agronomist all his life. From a District Agronomist in the Riverina with NSW AG, Developing Marginal Dryland and New Irrigation Systems with Permanent Raised Beds & Controlled Traffic Farming Systems ; to ACIAR – Australian Centre for International Agricultural Research, where he pioneered the International Landcare Approach in the Philippines, introducing Conservation Agriculture Techniques.

He then developed a closer relationship with NRM- Natural Resource Mgt in doing such Landcare- Watershed Mgt projects, and in the process discovered the unique attributes of Cannabis. He has been a Hemp Agronomist for the last 9 years, based in Maleny SEQld and Cambodia, and presently heads up the HFS - Hemp Farming Systems Consultancy group.
